

Cloud4Partners Hosting for MyWave Partners

GET STARTED >

As a MyWave partner, your hosting environment should empower your success—not complicate it. Cloud4Partners offers secure, scalable, and fully customizable hosting options designed exclusively for MyWave solutions. Whether you're running demos, developing waves, or managing live customer environments, Cloud4Partners ensures the infrastructure is optimized to support your goals.

This guide outlines everything you need to know about setting up and managing your hosting environment, ensuring smooth operations, and seamless integration with MyWave and SAP Business One.

Inclusive LLM Account

Pre-installed GPT delivers advanced AI capabilities, included as part of your subscription for seamless integration.

Rapid Deployment:

Set up the MyWave Runtime within days, enabling your business to get started with minimal delays.

Scalability on Demand:

Easily scale resources up or down to meet changing business needs without disrupting workflows.

Cost Efficiency:

Flexible pay-as-you-go pricing reduces upfront costs and aligns technology expenses with your business growth.

Robust Security You Can Trust

Cloud4Partners places security at the heart of its hosting solutions, ensuring your data and your customers' data remain protected at all times.

Isolated Databases

Each customer's data is securely segmented, preventing any risk of cross-access or unauthorized sharing value.

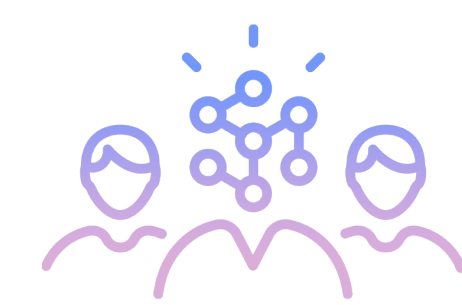

Access Control

A small, highly trained team of engineers exclusively manages the hosting infrastructure, minimizing exposure to sensitive systemsvalue.

SSO Integration

Leverage SAP Business One's Single Sign-On (SSO) for secure and streamlined authentication.

Partner-Managed Access

Take full control of user permissions, ensuring transparency and accountability across your SAP systemsvalue.

Cloud4Partners's hosting environments adhere to the highest standards of data security and privacy, giving your customers the confidence they need.

Your Hosting Options

Cloud4Partners offers flexibility to meet the needs of every MyWave partner, whether you're conducting a demo, building new waves, or running production workloads.

Demo Environments

Ideal for testing and showcasing MyWave solutions.

- **Shared Demo Databases:**
Quickly get started with our pre-configured demo environments.
- **Dedicated Demo Databases:**
Tailored environments for industry-specific needs, allowing partners to provide more personalized demos.

Customer Environments

Reliable and secure hosting for customer use.

- **Fully Isolated Virtual Private Clouds (VPCs):**
Each live environment is securely separated to ensure high performance and maximum security.
- **Seamless Transition:**
Move effortlessly from demo to live environments with minimal disruption to your workflow or customer operations.

Our hosting options provide flexibility to adapt as your business and customer demands grow.

Hosting Price

Cloud4Partners offers flexible pricing options designed to align with your specific hosting needs, whether for demos, testing, or live production environments. Pricing is tailored based on the following factors.

USERS	GBP	EUR	USD
5 to 49*	£7.00	€8.50	\$9.00
50 to 99*	£5.00	€6.00	\$6.50
100	£3.00	€3.50	\$4.00
*5 user minimum order			

For a detailed quote or to discuss specific requirements, contact your MyWave Account Manager or submit a pricing request via the support portal. Cloud for Partners ensures competitive pricing that grows with your business while delivering top-tier performance and security.

Setting Up Your Hosted Environment

Step 1: Submit Your Hosting Request

Provide the following details.

- Number of users.
- Hosting type (demo, test, or production).
- SAP Business One or other system configurations.

Submit these details through your MyWave Account Manager.

Step 2: Complete the Statement of Work (SoW)

For setting up a customer environment, collaborate with MyWave to draft a detailed SoW that includes.

- Infrastructure components: AI Server, Integration Server, Kafka Queues, Postgres RDS.
- Licensing needs based on user counts.
- Customizations are required for unique business workflows.

Step 3: Environment Deployment

After the Statement of Work (SoW) is approved, the deployment process usually takes 2–3 business days.

As part of the deliverables, you will receive a fully configured runtime environment and an SAP Business One add-on file (MTAR).

Step 4: Testing and Handover

Validate the environment with provided credentials and configurations before onboarding customers.

Seamless Integration with MyWave and SAP Business One

Cloud4Partners ensures that connecting your **SAP Business One** system to MyWave is as smooth as possible, enabling you to unlock the full potential of your hosting environment.

Submit Your Hosting Request

1. Install the MTAR File

Use the SAP Business One add-on we provide to establish a connection with the MyWave runtime. This MTAR file is crucial in establishing the connection between your SAP Business One system and the MyWave runtime environment.

2. Configure Settings

Set up the connection using the credentials and URLs provided during the environment handover. These configurations ensure seamless communication between your SAP Business One environment and MyWave.

3. Streamlined for Cloud4Partners Hosting

Integration becomes even more efficient if your SAP Business One system is hosted with Cloud4Partners. The shared infrastructure allows for smoother configurations and eliminates potential compatibility issues.

Wave Deployment Made Easy

Deploying your MyWave packages into the runtime environment is simple and efficient. A cutting-edge deployment tool will soon allow partners to upload and deploy wave packages instantly.

With this tool, you can:

- Save time by eliminating the need for tickets.
- Avoid errors with an automated process.
- Enhance development cycles with quick testing and deployment capabilities.

This tool is designed to support agile workflows, making wave deployment faster, more reliable, and entirely self-service.

Comprehensive Support Every Step of the Way

Your First Point of Contact

If you encounter any issues, your first step is to reach out to MyWave Support. They will assess your request and escalate to Cloud4Partners if the issue involves the hosting platform.

How MyWave Support Can Help

- **User Management:** Add or remove users as your team evolves.
- **Scaling Resources:** Adjust server capacity to handle increased workloads.
- **Issue Resolution:** Get timely support for connectivity or performance concerns.

Let's get Started

Your hosting environment is the backbone of your operations, enabling you to develop, showcase, and deploy MyWave solutions with confidence.

With Cloud4Partners, you gain access to secure, scalable, and fully customizable hosting designed to meet the unique demands of MyWave partners. From robust security measures to seamless SAP Business One integration, every detail is crafted to support your success.

Take the next step to elevate your business.

Contact MyWave to explore hosting options, submit a hosting request, or discuss your specific requirements. With Cloud4Partners, you're not just getting hosting—you're gaining a strategic partner dedicated to your growth and innovation.
